***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gongwer (4377982) in view of Loewy et al (5366176).

Gongwer shows elements 18 and 14 on the aft of the body that are operated in oscillations and in patterns around the craft to control the craft in pitch, yaw and roll.

Loewy et al teaches that a craft can be controlled with pressure sensors on the control surface and through a closed loop system control the attitude of the craft.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the closed loop control system of Loewy et al to automatically control the craft of Gongwer (his controls are 18 and 14) with a closed looped system as taught by Loewy et al since it is the mere application of automatic control for manual.

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

**Drawings**

2. The drawings have been approved.
